

Dear Correctional Employees,

The Oklahoma Correctional Employee Memorial is progressing right along and the Foundation is excited to announce that Mass Architects, the commissioned architect firm for the memorial, is placing a 6'x6' preview sample of the wall on the front lawn at Headquarters in Oklahoma City. The wall consists of beautiful native rock and is structurally supported with metal beams and bound in mesh netting. Metal plates attached to the beams will reflect the names of each DOC facility. The sample wall is an exact likeness of the walls designed for the memorial; in fact the sample wall will be incorporated as part of the completed memorial. Onsite construction will enable all to view the project from beginning to end, and the beginning date will be announced as soon as it is confirmed.

The memorial provides a public means to honor those whose lives were taken in the line of duty, but it also affords tribute and recognition to current deserving correctional employees for their exemplary performance in serving the people of Oklahoma and the Department. For these reasons, it is with great pleasure that we invite and welcome everyone to visit Headquarters and view this integral part of the memorial honoring our former colleagues and those of you currently serving with excellence, the Department and your communities.

A handwritten signature in black ink, reading "Ann Landry". The signature is written in a cursive style and is enclosed within a simple rectangular border.
